

SC 40RE

Scanjet tank cleaning equipment

Scanjet Model SC 40RE is a robust and very flexible type of tank cleaning machine specially designed for marine and off-shore applications. Scanjet Model SC 40RE is electrical driven.

Twin nozzle tank cleaning machine

The SC 40RE gives the user the possibility to optimise the cleaning operation and is preprogrammed to minimize the use of time, energy and cleaning media.

SC40 RE has very few moving parts requiring a minimum of service and is maintenance free inside tank.

Adjustable rotation speed

The rotation speed can easily be adjusted on the driving unit.

Typical applications for SC 40RE

- Chemical carriers
- Product carriers
- Offshore applications
- River barges
- Deck tanks
- Recidual tanks

KEY FEATURES
